FROM THE DIRECTORS

When we decided to remount Tissue for STF 2018, one of the things that we were incredibly excited about was the opportunity to revisit and refine the work with almost two years of personal and professional growth, as well as two years of distance from the original making process. Re-entering the world of the characters and the chorus has been an absolute joy for us, and it is such a fun challenge to build the world that they inhabit.

The nature of the script demands collaboration, and we are so lucky to be working with a team that is dedicated, rigorous, talented, and committed to realising our shared vision.

At its core, Tissue is an exploration of shame culture and communication - or lack thereof. We spend so much time in taking media in different ways, often totally unaware of how it's shaping the way we make sense

of the world. Sometimes it takes something big – a conflict, a tragedy – for our unconscious biases to become illuminated, to offer an opportunity for change.

We sincerely hope that Tissue will open the door to some healthy conversations, and helps to clear away the clouds of stigma, shame and silence that hold us back. Be honest with yourself, and proud of your sexuality! Pay for your porn! Love freely, generously, and safely, and demand the same in return.

We have had so much fun bringing this show to you all, we hope you enjoy the result!
